Thermodeck

Safety guaranteed

A Thermodeck cover, like all Delta covers, is the best available means of preventing accidental falls into a pool.

Thermodeck complies with every stipulation of the French standard NF P 90-308 and allows you to enjoy your pool with complete peace of mind.

With a simple twist of a key and in just a few seconds, your cover closes effortlessly over your pool. Your pool is secured. Your peace of mind guaranteed.

Beautiful

Thermodeck combines effective and reliable protection with an undeniable visual appeal. Each cover is designed to harmoniously follow the pool contour and the wide choice of slat colours allows you to add an additional touch of refinement.

Thermodeck, the best, and most beautiful, protection available.

A simple, cleverly designed system

Thermodeck is a Delta cover, designed and manufactured by a market leader.

Thermodeck, the best protection available

Pure water

Thermodeck covers have an opacity coefficient that inhibits photosynthesis and hence the growth of algae. Your pool water is cleaner thus economising filtration time and water treatment products.

Temperate water

Thermodeck shelters your pool against cool nights and cold gusting winds. You can begin your pool season in early spring and extend it into late Indian summers.

With Delta, you can relax.

Become an ecocitizen

By keeping your pool clean and reducing filtration time, Thermodeck saves on energy and on pool chemicals.

Because Thermodeck reduces the quantity of water treatment products necessary, it lessens your pool's ecological impact on the environment.

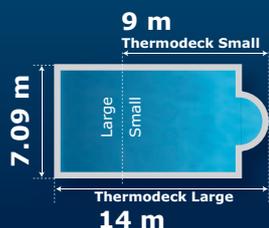

Lastly, as part of its overall environmental design, the PVC that makes up your cover can be recycled. With Thermodeck, you get cutting edge technology and reduce your environmental foot print.

Thermodeck

2 versions available

Large
Maximum dimensions
(steps included)
7.09 m x 14 m

Small
Maximum dimensions
(steps included)
7.09 m x 9 m

A sober, classic design

With its elegantly simple, square cross section housing, made of extremely strong Moabi wood, pine or anti-UV treated PVC, Thermodeck embellishes any pool setting.

- Lateral protective casings on the motor side and the bearing side.
- Works off a 230V mains supply.
- Rolls up in just two minutes; pool 10 x 5 m.

• Easy to use

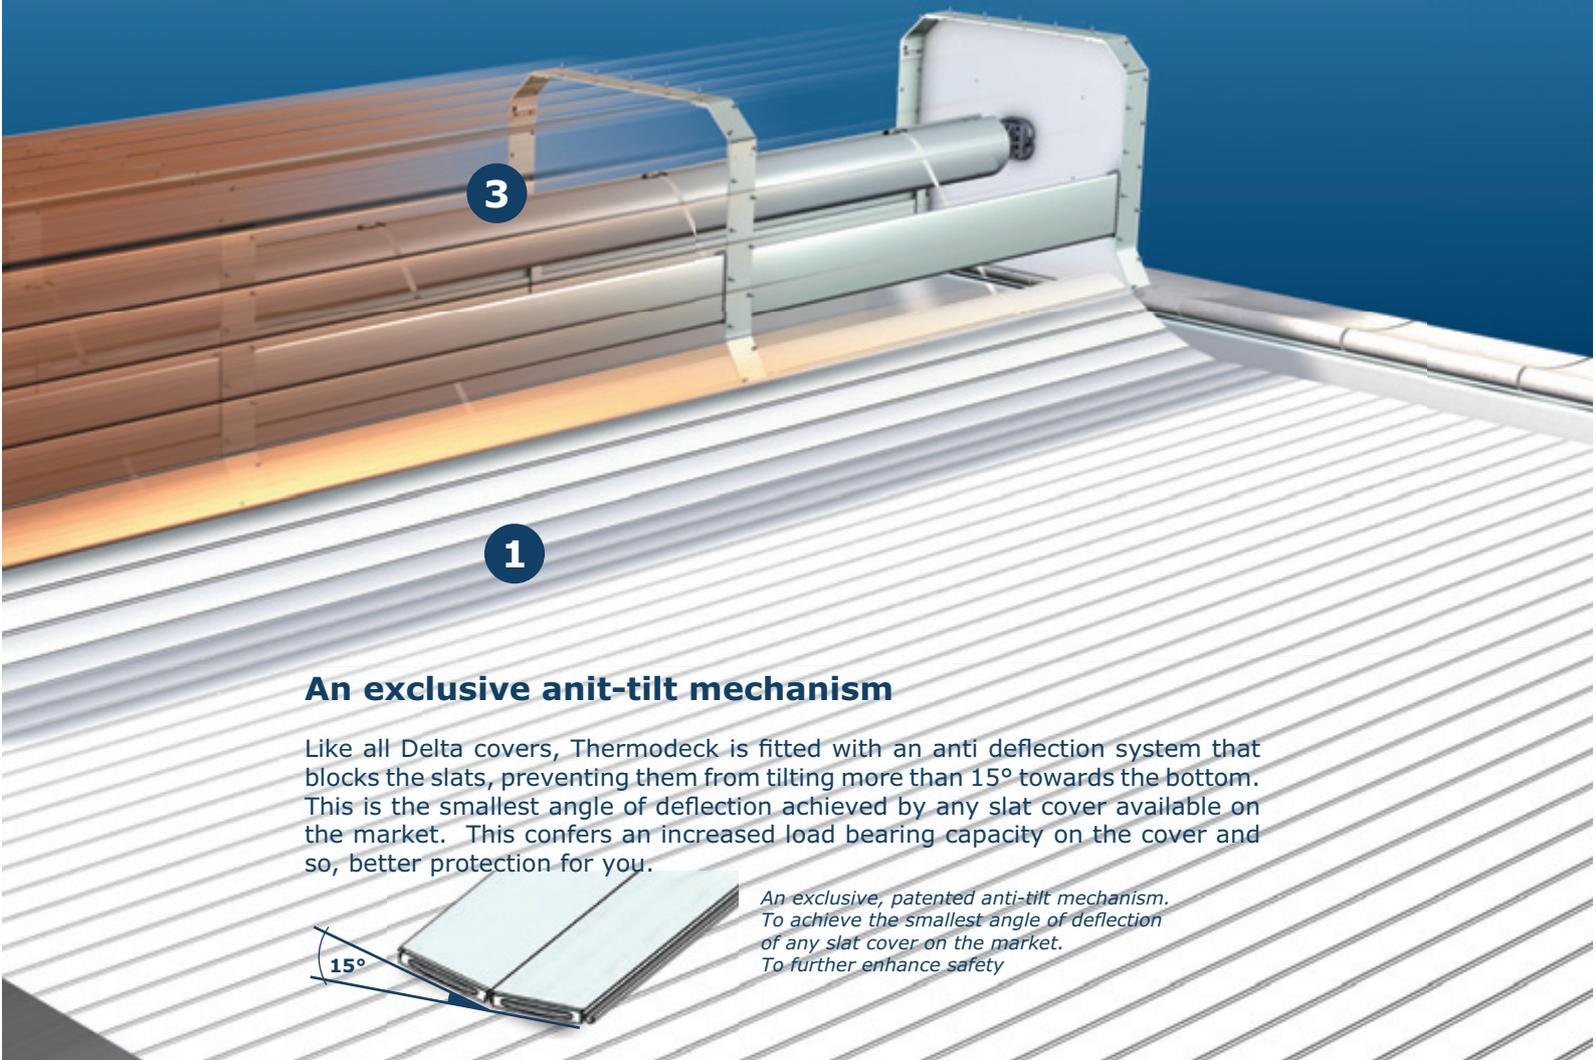

A key operated switch, mounted near the pool and out of reach of children, commands operation of the slat cover while allowing the user to keep an eye on the pool to be sure that no-one is in the water while the cover is moving.

• Steps

Delta covers can be made to fit straight steps, roman steps, even free-form steps. Two type of finish are available, stepped or smooth.

Thermodeck, the best protection available

An exclusive anti-tilt mechanism

Like all Delta covers, Thermodeck is fitted with an anti deflection system that blocks the slats, preventing them from tilting more than 15° towards the bottom. This is the smallest angle of deflection achieved by any slat cover available on the market. This confers an increased load bearing capacity on the cover and so, better protection for you.

An exclusive, patented anti-tilt mechanism. To achieve the smallest angle of deflection of any slat cover on the market. To further enhance safety

1 Slat cover

Thermodeck slats come in five different colours. Choose yours.

2 Delta Lock fasteners

Select your Delta Lock safety fastener colour from the palette available.

9 Delta Lock fastener colours are available: *Light blue, Dark blue, White, Caribbean Green, Beige, Grey, Anthracite grey, Black, Translucent Blue.*

3 Anodised aluminium axle

Reinforced internal structure

4 Aquamat motor

Protected against intermittent splashing, ends of travels programmed electronically.

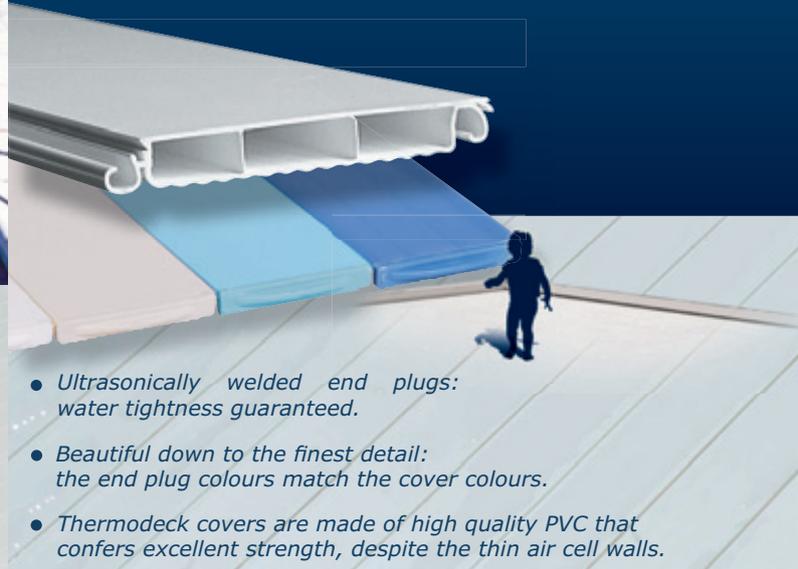

5 Cover housing models (small or large)

Unique slat design

The best air volume/ slat thickness ratio available on the market

- *Ultrasonically welded end plugs: water tightness guaranteed.*
- *Beautiful down to the finest detail: the end plug colours match the cover colours.*
- *Thermodeck covers are made of high quality PVC that confers excellent strength, despite the thin air cell walls.*

Some of the most important advantages offered by Thermodeck covers are a result of this unique slat design; a large volume of air trapped inside the minimum amount of plastic.

The benefit is three-fold:

- Firstly, the air volume/slat thickness ratio ensures excellent cover buoyancy compared to other covers with thicker slats, this increased buoyancy limits the displacement and evacuation of water when the cover is deployed.

- Furthermore, the slats are absolutely watertight, water cannot enter the air cells. The air trapped inside is thus static and dry, guaranteeing optimum thermal insulation.

- Lastly, because the slat cover is extremely buoyant, it has an excellent load bearing capacity and can easily support the weight of a grown man.

The little "Extras" that make all the difference

Procopi allows you to harmonise the colour of your cover, your liner and your pool fittings.

Aquareva System

by PROCOPI

Aquareva System is a software tool that shows you your pool before its even built.

(the simulation is limited to Coverdeck at the moment).

"What would be best with a beige liner?

Beige or white pool fittings?

And what would a grey cover look like?

And if I went for a more daring contrast?"

A few clicks will answer all your questions. Easy and convivial, Aquareva System is child's play. You can make an informed, confident decision, and choose the colours that will give your pool its character.

Maintenance made easy

Delta covers require little maintenance; they are designed to stay clean. When it comes to winterizing, Delta facilitates your life even further: the motor block on the motorised models is very light and can be removed with no tools in just a few seconds.

Summer and winter, Delta, offers the best possible protection.

Reduces evaporation from indoor pools

On indoor pools, the cover slats form an effective barrier that prevents evaporation and subsequent condensation on walls and windows. This barrier also significantly reduces heat loss and generates cost savings.

Unrivalled know-how

With the Delta range, PROCOPI offers you years of experience along with ultra-modern manufacturing tools that, together, ensure perfectly repeatable, strictly controlled, top quality production methods.

Legal information

All DELTA covers comply with the French standard NF P 90-308 (May 2004 version concerning pool protection) if all items comprising the cover are supplied by Procopi.
Pool safety cover intended to deny children under five access to the pool.
This cover is no substitute for common sense or individual responsibility. Nor is it intended to replace the vigilance of parents and/or responsible adults that remains the key factor in ensuring the safety of young children.
